To Mining Men;-The PROSPECTOR is always desirous of giving full and reliable news of the mining industry of Cochise county, we will consider it a favor if those interested, or who are in a position, would from time to time send in full reports to this office. This will no doubt attract attention to your immediate district and naturally result in the exploration of the mineral deposite by capitalists. Send in your item, whether they are few or many.

According to the estimate of the St Louis Globe-Democrat, a goldbug journal of the class which does not inassertion and encers, McKinley and Bryan get an even start. The states counted for the St. Louis platform cast 161 electoral votes while the states counted for Bryan cast 159. The difference to begin with is only two votes. As the successul candidate must receive 224 votes the balance may be looked for in the doubtful list, casting 127, and including in the Globe-Democrat's opinion, such states as California, Illinois, Indiana, Iowa, Kanese, Kentucky, Maryland, Michigan, Minnesots, Oregon and West Virginia. The average free coinage advocate rests satisfied with this doubtful list.

The following is from Secretary and everything and manage to put Carlisle's speech of 1879, before he was hypnotized by Cleveland: "According to my view, the conspiracy which seems to have been formed here and and we would like to help them out in Europe to destroy by legislation and otherwise from three-sevenths to ene-half of the metallic money of the world is the most gigantic crime of this or any other age. The consummation of such a scheme would ultimately enteil more misery upon the human race than all the wars, pestilences and famines that ever occurred in the history of the world." And yet he, an American, born and reared on from a short trip to Tombatone. the soil that has produced so many patriots, was willing, for the gild of a cabinet position, to turn his back upon his race and become a party to this erime, and by so doing lost his opportunity of being president.

Since the editors of the Bisbee Orb have insisted that we run our Bisbee column according to their methods and bowled us out so unmercifully, we think it no more than right that we should have our equal and just division of all spoils. For more than a month now our mouth has been watering over the numerous batches of fruits, cakes, pies, etc. whose receipt is weekly acknowledged in the columns of the Orb. This puffing racket seems to be one of their most profitable methods and we see no reason why we also should not enjoy some of its benefits.

For these reason we have decided o s'art a "begging bureau" of our own, This will be conducted on the most approved methods and satisfaction is guaranteed to all donors. Donations of anything in the way of ratables, will be cheerfully accepted and their receipt acknowledged in the Bisbee column, together with appropriate items as, to the gentleman's high standing in the community, to the lady's reputation as a worthy housekeeper, to the young lady's merits and eligibility; etc, etc, etc.

Probably Work will Begin Within Six Months.

According to the Star, no recent information has been given out on the ubject of the extension of the Gila Valley, Globe and Northern railroad, but there is a feeling along the line that within the next six months the road will be pushing its way across the San Carlos reservation, Captain Myers, of San Carlos, says that the complications which stopped the road at Geronimo may be easily and quickly r moved.

An accident connected with the late e-tablishment of a postoffice at Geronme indicates that the sailroad com pany does not intend to allow that desert station to remain the northern terminus of the line very long. The present contract with the government for carrying the mails provides for service only as far as Fort Thomas. Since the new office was established Arizona has been much derided by and the station agent at Geronimo was appointed postmaster, Geronimo mail has been sent on to the terminus but the railway mail agent has not accompanied it. All mail for San Carlos and Globe is forward d directly from Fort Thomas.

The railroad company was asked by the government to submit a bid for the extension of the service to Geronimo. President Garland replied that the line was so short that it was hardly worth while but that the company would earry the mails for nothing. So the service between Fort Thomas and Geronimo as well as the posts flice at the latter place costs the government nothing. It is inferred that the generosity of the railroad company is inspired by the knowledge that it will soon be able to offer a bid on a larger

For real blood diseases relief can only be obtained by using a real blood reme-dy. So many people who are sufferers from an obstinate or deep-seated blood disease make the mistake of taking rem-edies which at best are only tonics and cannot possibly reach their trouble. It is in just such cases which other so-called blood, remedies, cannot reach that blood remedies cannot reach that S.S.S. has made some of the most won-derful cures. Rheumatism is one of the most obstinate diseases of the blood, and there are few remedies which have
